Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: Group I, figure 5, claims 1 and 3, Group II, figures 7-10, claims 2, 4, and 5, and Group III, figure 6, claim 6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Charles Prescott on November 22, 2005, a provisional election was made without oral traverse to prosecute the invention of Group 1, claims 1 and 3. Affirmation of this election must be made by applicant in replying to this Office action. Claim 2, 4, 5, and 6 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Charles Prescott on November 22, 2005.

The application has been amended as follows:

Claims 3 and 6 have been cancelled.

Claim 2, line 19, after "assembly", --; and

a pair of offset locking pins, one pin of which is threadably attached to and laterally extends from one said insert frame stile and adapted to be inserted into a mating first hole formed into the facing sliding door stile while another pin of said pair of locking pins is threadably attached to and laterally extends from the facing sliding door stile adjacent to the first hole and in alignment with a second hole formed into said insert frame stile, whereby said insert

frame and the sliding door are connected together by said locking pins when said insert frame is positioned in the opening and against the sliding door-- has been inserted.

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance of claims 1 and 2 is the inclusion of a pair of offset locking pins, one pin of which is attached to and laterally extends from one said insert frame stile and adapted to be inserted into a mating first hole formed into the facing sliding door stile while another pin of said pair of locking pins is threadably attached to and laterally extends from the facing sliding door stile adjacent to the first hole and in alignment with a second hole formed into said insert frame stile, whereby said insert frame and the sliding door are connected together by said locking pins when said insert frame is positioned in the opening and against the sliding door. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hugh B. Thompson II whose telephone number is (571) 272-6837. The examiner can normally be reached on Monday thru Friday 9 am to 5:30pm.
